

```

class Parent extends React.Component {
  state = {
    name: "banuprakash"
  }
  render() {
    <A name={name} />
  }
}

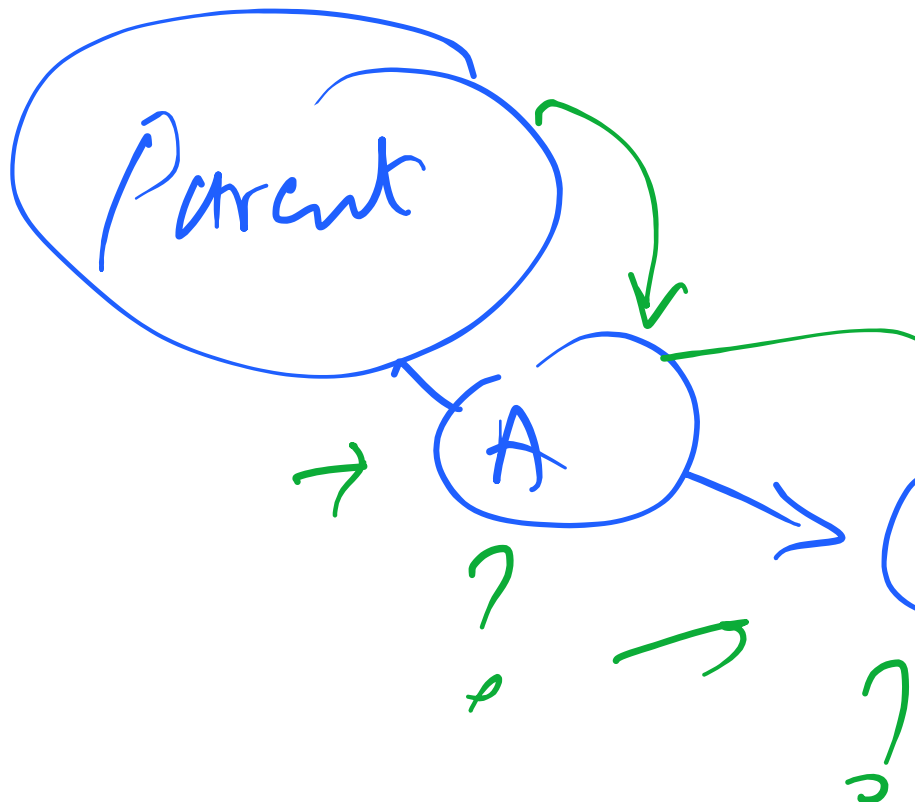

```

*this.state.name*

```

function A(props) {
  return <div>
    I am A comp <br />
    <B name={props.name} />
  </div>
}

```

```
function B(props) {  
  return <div>  
    I am B  
    <C name={props.name}/>  
  </div>  
}
```

```
function C(props) {  
  return <div>  
    I am C <br />  
    Name is {props.name}  
  </div>  
}
```
