

```
class MyComp extends Component {
```

```
  state = {
```

```
    x : 10,
```

```
    y : 15
```

```
  }
```

```
  setX(no) {
```

```
    this.setState({
```

```
      x: no
```

```
    })
```

```
  }
```

```
  setY(no) {
```

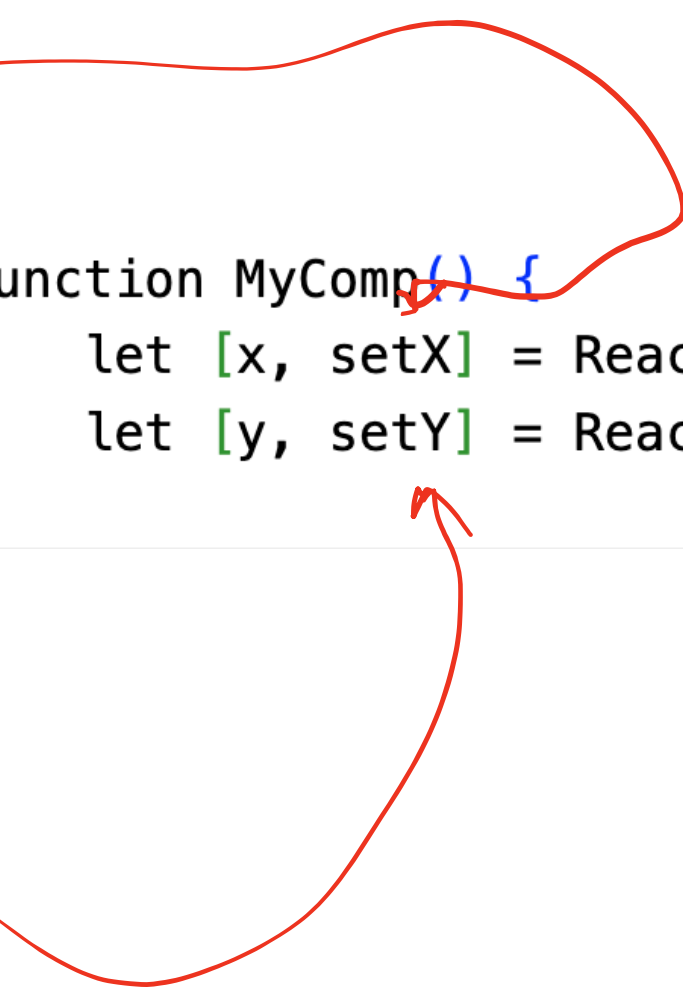

```
    this.setState({
```

```
      y: no
```

```
    })
```

```
  }
```

```
}
```

```
function MyComp() {  
  let [x, setX] = React.useState(10);  
  let [y, setY] = React.useState(15);  
}
```
